

The Union Ink Company Ltd

Certificate of Compliance
to
OEKO-TEX Standard 100
Specification for the absence of undesirable
substances in textiles and clothing

All Union and Rutland PVC & Phthalate free Inks coded EKO or HS-A are formulated to conform to the requirements of Oeko-Tex 100 Product Classes I,II & III and have been independently tested to ensure compliance .

It is important to remember that the OEKO-TEX standard is not for inks but applies to the textile with a print on it. If a test certificate is required we recommend the use of a OEKO-TEX approved laboratory for testing on a batch by batch basis.
